#103

Effort with FOCUS..□

Imagine this…

A person keeps running all day — but without direction…

Where will they reach? □

□ Nowhere. Just tired… not successful.

In the same way…

Hard Work + No Focus = Confusion + Frustration

Your effort matters,

but the direction of that effort matters even more.

□ With focus:

Even small efforts create results

□ Without focus:

Even massive effort gets wasted

□ Remember:

“Sunlight spread everywhere only gives warmth…

but when focused at one point, it can start a fire!”

□ That is the power of focus.

□ Tagline:

“Effort without direction brings exhaustion…

Effort with focus brings success!”
